

What is a hackathon?

HACK EPILEPSY

A TWO-CITY HACKATHON WITH A SINGLE PURPOSE:
IMPROVING THE LIVES OF PEOPLE WITH EPILEPSY

Inspired by **patients.**
Driven by **science.**

Hack Epilepsy is sponsored by UCB, a global biopharmaceutical company
and organized by InBioVeritas and HealthStartup.

What is a hackathon?

Very, very
motivated
people

What is a hackathon?

Focus is on
building
something
concrete

What is a hackathon?

Time
constraint:
54 hours

A bit of history

Geeks (still) rule.

It started in the
developer
community (1999)

A bit of history

Evolved beyond coding by
the startup community
(Startup Weekend since
2007)

A bit of history

Last decade: adopted by universities, corporates and governments

Practical

Panna Cotta

Choc & Orange

Coconut

Caramelita

Swis Chocolate

Vanilla Dream

Raspberry

Maple Walnut

Strawberry

Rhubarb

Passion Fruit & Mango

Pistachio

Our 5 secret ingredients for a hackathon that delivers

- 1. Challenges**
- 2. Customers**
- 3. Captains**
- 4. Channels**
- 5. Complete lifecycle**

Does
it
work?

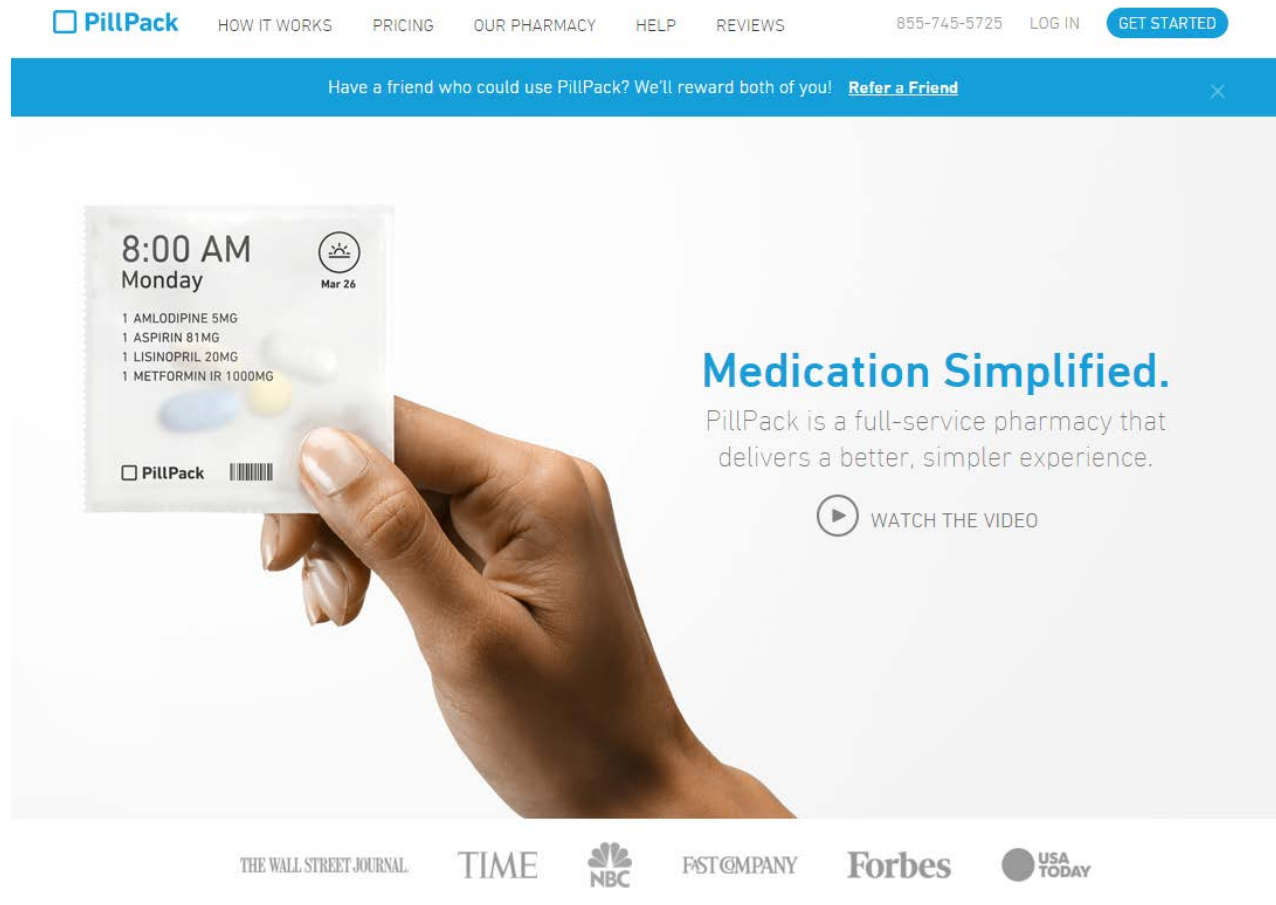

**LindaCare closes a € 1.5M S
to launch its activi**

LindaCare makes tele-monitoring easier

Leuven, Belgium: 4 December 2015 – LindaCare,
tele-monitoring solutions for chronic disease patients

They work

- iMinds funding, traction, customers, growth
- Conceived in 2012 at HackforHealth (MIC Vlaanderen/HealthStartup),
- Inspired by input from cardiologist + great team leader

They work

- \$62,8m funding in 4 rounds
- Conceived in 2011 at MIT Hackathon (Hacking Medicine)

They work

- 100 super-motivated people came from all over the world
- Concrete results: 17 projects all with a working prototype, built in one weekend, today 6 are still very active (5 of them supported by UCB).
- Huge enthusiasm among all stakeholders, including patient advocates and healthcare professionals.

MOMALA
high quality diagnosis for low resource environments

MOMALA Social Enterprise Winner mHealth hackaton Sponsor
